

Weekly Progress Report: Week 15

Mujawwad Project Team

Dec 15th – Dec 21st

Week 16: Frontend Development & Technology Stack Review

Task	Description
Frontend Implementation (XML)	Initiated development of the mobile application interface using XML (Android Native). Implemented core layouts based on the UI mockups, including the Recitation Dashboard and Profile Page.
Technology Stack Evaluation	Conducted a comparative review of alternative frontend frameworks to ensure optimal performance and scalability. Evaluated React.js and React Native against the current XML-based approach.
