

Weekly Progress Report: Week 14

Mujawwad Project Team

Dec 1st – Dec 7th

Week 14: Software Design & Architecture Modeling

Task	Description
Architectural Design (SDS)	Defined the high-level System Architecture, partitioning the system into core subsystems: Front-end (UI), Back-end (API), and AI Processing Engine (Phoneme/Audio Analysis).
UML Modeling	Developed key UML diagrams to visualize system structure and behavior: Class Diagrams: Modeled data entities and their relationships. Use Case Diagrams: Mapped user interactions to system boundaries.
Interface Design	Designed detailed User Interface (UI) for the mobile application. Created UI for the Home Screen, Recording Interface, and Feedback View.
