

Weekly Progress Report: Week 15

Mujawwad Project Team

Dec 8th – Dec 14th

Week 15: Software Design & Architecture Modeling

Task	Description
SDS Document Finalization	Draft-to-Specification Conversion: Finalized all sections of the Design Document, converting the working draft into the official Software Design Specification (SDS). Validated all content against the formal template requirements.
Architectural Diagram Finalization	Module & Sub-Module Design: Completed detailed Module Level and Sub-Module Level diagrams, defining internal component boundaries and interactions. Diagram Suite Completion: Finalized the complete set of architectural diagrams, including: • State Transition Diagram • Class Diagram • Sequence Diagram • Entity Relationship Diagram
User Interface Design	Built detailed GUIs (User Interfaces) of several pages including Home, Authentication and Profile pages for the mobile application.
Design Review	Conducted a final internal review of the SDS and all accompanying diagrams to ensure technical accuracy and consistency before submission.
